PROFESSIONAL SUMMARY

Full-stack developer with 5+ years of experience building SaaS platforms, internal tools, and AI-powered applications. I build products end-to-end — from Next.js and React frontends to Supabase and PostgreSQL backends, with cloud infrastructure on AWS and Vercel. Recent work includes a Shopify ERP dashboard, an AI-powered document analysis platform using Claude API, and a loan management system with dynamic forms and multilingual support. I integrate AI into real workflows, ship fast with TypeScript and modern frameworks, and handle everything from Stripe billing to HIPAA-compliant AWS deployments.

EXPERIENCE

Founder & Full Stack Developer, DevMahesh

Feb 2026 – Present | Remote

- Founded a solo dev agency building full-stack web apps, SaaS platforms, and internal tools for clients across healthcare, e-commerce, and fintech.
- Built products like Earph (Shopify ERP), Bench Equity (loan management), Deal Nexa (AI document analysis), and VectraView using Next.js, Supabase, and Claude API.
- Managed AWS infrastructure — EC2, HIPAA-compliant VPC, RDS Postgres, S3, Docker deployments, and patient portals for healthcare clients.
- Integrated Stripe payments, Shopify webhooks, Resend emails, and AI-powered features across multiple client projects.

Full Stack Developer (Contract), Contour

May 2022 – Jan 2026 | Remote, US based

- Built internal tools for operations teams using Bubble, WeWeb, and Supabase to streamline business processes.
- Worked on performance optimization across database queries, API calls, and front-end rendering.
- Set up CI/CD pipelines and handled deployments to accelerate release cycles.
- Used AI/LLM tools extensively for faster development and automation of complex workflows.

Bubble Developer (Freelance), Cappelendimyr

Oct 2021 – Jul 2025 | Remote, Norway based

- Built inventory management system used internally for tracking and operations, improving workflow efficiency.
- Integrated multiple third-party APIs for payments, notifications, and data synchronization.
- Designed automated workflows in Bubble to streamline business processes and reduce manual intervention.
- Handled comprehensive testing and bug fixes to maintain system reliability and minimize downtime.

Bubble Developer (Contract), Savd Technologies

Jun 2021 – May 2022 | Remote, Mexico based

- Built a complete food delivery application for reusable containers from scratch, handling all aspects including design, database architecture, workflows, and third-party integrations.

PROJECTS

Freel - Freelance Platform

Comprehensive SaaS platform for freelance developers to manage projects, track time, generate invoices, and showcase portfolios. Built with serverless architecture, real-time database, and AI-powered development workflow.

Technologies: Next.js 15, TypeScript, Supabase, AWS Lambda, Vercel, Tailwind CSS

Earph - Shopify ERP Dashboard

Shopify ERP dashboard that syncs orders, products, inventory, and customers in real time. Features AI-powered queries, PDF invoicing, and Stripe billing.

Technologies: Next.js 14, TypeScript, Supabase, Shopify API, Stripe, Vercel

Deal Nexa - AI Document Analysis Platform

AI-powered document analysis and deal management platform for M&A professionals. Features document parsing, risk detection, collaborative annotations, and a full deal pipeline with team workspaces.

Technologies: React, Express, Supabase, Claude API, BullMQ, Vercel

Bench Equity - Loan Management Platform

Loan management platform for real estate builders and developers. Built dynamic form system where admins can modify questions, application dashboard, and comprehensive user management.

Technologies: Next.js, TypeScript, Supabase, Tailwind CSS, Radix UI, Vercel

Instabook - Fitness Class Management Platform

Platform for yoga, pilates, and fitness instructors to launch and manage their classes. Developed payment modules, blog system, and internal messaging.

Technologies: Bubble, Payments, Blog, Messaging

Prepwork - Food Delivery Platform

Food delivery platform for home chefs in the US. Automates orders, payments, subscriptions, and customer communication for meal prep businesses.

Technologies: Bubble, Stripe, Twilio, Postmark, Automation, Subscriptions

Wheeler - Healthcare Management System

Pediatric and orthopedic hospital system with multiple brands. Built user-facing websites and internal tools for doctors to record notes, manage patient information, and handle billing.

Technologies: Healthcare, Internal Tools, EHR, Billing, Whisper

Pentaskill - Agency Website

Agency helping businesses and organizations with their technical needs. Developed the complete multilingual user-facing website with focus on design and user experience.

Technologies: Bubble, UI/UX, Multilingual, Web Design

EDUCATION

Bachelor of Technology in Computer Science & Engineering

Vignan's Institute of Information Technology

May 2015 – Jun 2019 | Visakhapatnam, Andhra Pradesh

TECHNICAL SKILLS

Frontend Development: Bubble, TypeScript, JavaScript, HTML/CSS, Tailwind CSS, WeWeb

Backend & Database: Python, SQL, Supabase, REST API, Wasabi, Google Cloud Run

DevOps & Tools: Git, CI/CD, Vercel, DigitalOcean, Jira, Agile

Integrations & APIs: Stripe, Postmark, Twilio, Docparser, OpenAI, Whisper
